SYSTIMAX® InstaPATCH™ Plus Ruggedized Fanout Cables

The SYSTIMAX® InstaPATCH™ Plus System features a high-density, factory-terminated, factory tested, modular fiber connectivity solution that allows installers to simply and quickly connect system components together.

Developed by SYSTIMAX Labs, the InstaPATCH Plus System is designed to support locations, such as data centers, that require high-density, rapid deployment and high performance. The InstaPATCH Plus System incorporates SYSTIMAX LazrSPEED® multimode and TeraSPEED™ singlemode fiber technologies to support today's most demanding applications, while allowing easy migration to the next generation technology.

The InstaPATCH Plus ruggedized fanout cables support direct connection to equipment from the patch panel. Terminated with MPO connectors on one end and clipped duplex connectors (LC, SC or ST) on the other end, the ruggedized fanout cable is designed for use with InstaPATCH Plus modular shelves and the MPO panels.

The ruggedized fanouts are available in LazrSPEED 300 and TeraSPEED Solutions, and in 12, 24, 48 and 72 fiber counts. The fanout is built with either

InstaPATCH IPR (ribbon) or InstaPATCH IPD (12-fiber subunit distribution cable), and furcated to individual fiber legs, terminated with individual connectors. Each fiber leg is protected with aramid yarn and 2.0mm furcation tubing for rugged applications.

Ruggedized fanout cables can be ordered in custom length, with or without a pulling eye on the MPO end. The length of the furcated legs are approximately 48 inches from the connector end.

Features and Benefits:

- 12-fiber MPO connector based modular design enables simple connections
- Ruggedized fanouts are constructed with LazrSPEED 300 fibers or TeraSPEED ZWP fibers to provide headroom for future system upgrades
- Provide ultra-high density patching to achieve maximum density of 216 individual fiber connections in 1U
- Factory-terminated and tested for instant field connections and guaranteed quality and performance
- Designed for administrative convenience - guaranteed transmit-to-receive connectivity
- No special or non-standard polarity component
